

Grady

OH NO! A BLAST from the PAST!

The **SHIT** **STORM** is **BACK!**

Had the shits for 48 hours or more?

Shigella is going around... again.

It's a dangerous bug that can live in poop. It's easy to get from any kind of butt sex.

Even if you use a condom.
Even just from fingering.

If you've had the runs for 48 hrs or more, get your butt to the doctor. Get tested for Shigella. Without the right treatment, you can end up in the hospital. And we don't want that.

Get treated. And hold off on sex until the storm has passed.

PS You were gonna wash your hands anyway, right?

How/ Crap!

That shit
NASTY

OMG POONADO!

eww
